Intelligent Controls

For the ultimate in innovation, Somfy's intelligent controls can operate your blinds, curtains, awnings or roller shutters without you having to lift a finger. You can quickly and simply make your home more comfortable and secure whilst at the same time reducing energy consumption and your home's carbon footprint.

Somfy also offers complete home control solutions ranging from the Telis Composio and Impresario 20 Channel controllers through to the Animeo Solo and Compact systems. Whether you are seeking simplicity of control or the ultimate in energy management there's an intelligent Somfy solution for you.

RTS Remote Controls

Our remote controls have been designed with flair and come in a range of colours to suit every décor! Telis remotes also come with a convenient and discreet wall mount, meaning you will always be able to find your remote when you want it.

With a range of 200 metres in open space, or around 20 metres through two reinforced concrete walls, you can operate your Somfy motor from anywhere in the home.

For your convenience, Somfy Telis remotes come with either 1 or 4 channels and for ultimate control the Telis Composio and Impresario feature 20 channels and an easy to use LCD screen. There's even a Telis Modulis with its revolutionary scrolling thumbwheel to easily adjust the slats on your Venetian Blind.

Telis 1 Channel RTS

Able to control one motor or one group of motors together.

Available in Pure, Silver, Patio & Lounge.

Pure

Telis 4 Channel RTS

With 4 individual channels for one motor or group of motors, Somfy Telis 4 Channel remotes have a 5th channel perfect for using as a group channel for all your motors.

Available in Pure, Silver, Patio & Lounge.

Telis Soliris 1 Channel RTS

Telis Soliris is designed for use with Somfy Sunis and Soliris sun sensors and enables the automatic sun functionality to be switched off. It will control one motor or one group of motors together.

Available in Pure & Patio.

Telis Soliris 4 Channel RTS

Available in the weatherproof and shockproof Telis Patio, the Soliris 4 channel combines the features of a Telis 4 channel giving individual and group control with the sun sensor control of a Telis Soliris.

Available in Patio only.

Telis Modulis 4 Channel RTS

With its revolutionary scrolling thumbwheel Telis Modulis makes perfectly adjusting the blades of your Venetian blind so easy.

Available in Silver & Lounge.

Telis Modulus Soliris RTS

Combining the revolutionary scrolling thumbwheel with sun sensor functionality in a single channel remote control. Enables the use of a sun sensor with an External Venetian Blind. *Did you know that you can set your blind to respond to the sun by stopping at the perfect tilt position every time!*

Available in Silver & Lounge.

Telis Composio RTS

With its easy to read LCD display and intuitive control options Telis Composio gives you control of up to 20 individual motors or groups of motors. Composio also has Soliris functionality allowing control over sun sensors.

Available in Silver & Lounge.

Telis Impresario Chronis RTS

Impresario Chronis RTS enables you to programme up to 16 of your favourite scenarios and recreate them at the time you want either manually or automatically with its built-in Chronis timer.

Available in Silver & Lounge.

"MY" Favourite Position

Somfy RTS motors all feature a favourite position, allowing you to easily stop your awnings, sunscreens and external venetian blinds in the same position time after time. Setting your favourite position is easy and once done simply press the 'MY' button on your Somfy remote control.

Sensors

Our sun sensors will extend your awning, or close your blinds, curtains, roller shutters or External Venetian Blinds when the sun reaches a pre-set intensity. As soon as the sun disappears, the awning retracts and everything opens. It's automatic shade for your home!!

Somfy's wind sensors protect the products that protect you! When the wind reaches a pre-determined strength, the sensor will retract your awning or sunscreen to help protect it from damage.

Eolis 3D Wirefree RTS

With no wires to connect, this innovative sensor is compact and unobtrusive. Reacting to the movement of the Awning's front bar the functionality of the Eolis 3D Wirefree RTS has been extensively laboratory and wind tunnel tested.

Sunis Wirefree RTS

Using an inbuilt solar cell the Sunis Wirefree RTS is installed without any wiring. Teamed with a Telis Soliris remote control it gives you total control over the sun.

Eolis and Soliris Sensors

Somfy's range of sensors includes the Eolis wind and Soliris sun & wind sensors. Both are available in a Wired Technology or RTS solution and are ideally suited to sunscreens and external venetian blinds.

Wall Mounted Controls

Somfy's wall mounted controls combine functionality with style. They allow individual control of a blind, curtain, awning or roller shutter or several applications at once as a master switch.

Wall switches are available hardwired or, for complete ease of installation using Somfy's innovative wirefree RTS technology.

Situo RTS

Do you want the convenience of a wall switch without wiring? Situo RTS will control one motor or one group of motors.

Centralis RTS

Centralis RTS is a single channel wireless wall switch designed in the classic Inteo style.

Chronis RTS

Chronis RTS is a single channel timer. Programme different opening and closing times for different days of the week. Chronis RTS is ideally used as a master control in combination with a Somfy Telis remote control.

Also available in Wired Technology versions.

Warranty

Somfy Products are synonymous with innovation, excellent quality, safety and durability. Each product is extensively tested to ensure it conforms with national and international standards before it leaves the factory. All Somfy motors, controls and sensors carry a 5 year warranty.
